## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

### ARIA

▲ `[aria-hidden="true"]` elements contain focusable descendents

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

### BEST PRACTICES

▲ Touch targets do not have sufficient size or spacing.

These items highlight common accessibility best practices.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)
